SUMMARY

Computer Science undergraduate with hands-on experience building AI agents, RAG pipelines, and vector-search-backed applications, taken from prototype to Docker-based deployment on cloud VMs.

TECHNICAL SKILLS

AI / Agents: PydanticAI, LangChain, Agent Orchestration, RAG, Vector Search (Qdrant), Semantic Memory, Celery (async task workers)

Languages & Frameworks: Python, FastAPI, JavaScript, TypeScript, Next.js, React.js, React Native, SQLAlchemy

Data & Infra: PostgreSQL, MongoDB, MySQL, Redis, Supabase, Firebase

Cloud & DevOps: AWS S3, Microsoft Azure (VM deployment), Docker (familiar), Cloudflare R2, Git/GitHub

Tools: Postman, Pydantic Logfire, n8n, VS Code

EXPERIENCE

Backend Developer Intern / Devliqly

Jun 2025 – Jul 2025

- Built and stabilized Node.js/MongoDB backend services, integrating 5+ third-party APIs and AI-driven features; optimized RESTful APIs and database indexing on AWS, cutting response time by ~200ms.
- Debugged and resolved production issues with a cross-functional team, supporting authentication for 10,000+ users.

Full-Stack Developer Intern / Quazire AI

Nov 2024 – Jan 2025

- Built responsive web applications with React, Node.js, and MongoDB, integrating third-party APIs and secure authentication.
- Designed and optimized RESTful APIs for performance and scalability using AWS and database indexing strategies.

PROJECTS

Vanshu AI — Agentic Personal Assistant & Orchestration Engine [Link](#) / [GitHub](#)

- Built an AI personal assistant with FastAPI and PydanticAI for agent orchestration, task automation, and semantic memory.
- Implemented background task workers (Celery/Redis), Gmail automation, document generation, and vector search (Qdrant); deployed via Docker on Azure Virtual Machines.

Tech Stack: FastAPI, PydanticAI, Celery, Redis, Qdrant, PostgreSQL, Docker, Azure

NovaMind — RAG-Based Chatbot [Link](#) / [GitHub](#)

- Built a Retrieval-Augmented Generation chatbot with FastAPI and LangChain for semantic document search and contextual retrieval.
- Implemented document ingestion, vector indexing, chat history, and streaming AI responses.

Tech Stack: Next.js, FastAPI, LangChain, Redis, Qdrant, Supabase

ImagineX — AI Image Generator [Link](#) / [GitHub](#)

- Built an AI image generation platform with real-time updates (FastAPI, React.js, SSE), including async generation workflows, authentication, and background processing.

Tech Stack: React.js, FastAPI, Supabase, ImageKit, SSE, Pydantic

ATS Score Checker — AI-Enabled Resume Analyzer [Link](#)

- Built an AI-powered ATS resume analyzer (React.js, Node.js, NLP) with skill extraction, ATS scoring, AI recommendations, and real-time evaluation via Socket.IO.

Tech Stack: Node.js, React.js, JavaScript, LangChain, Socket.IO

CERTIFICATIONS & ACHIEVEMENTS

- OCI AI Foundations Associate (Oracle) • Oracle Cloud Generative AI Professional • MongoDB Atlas Certification
- Published "Cloud Computing for AI and ML" research paper, IC-AMSI 2024
- Winner, 2+ Hackathons — rapid prototyping and software engineering under time constraints
