

About TechChefz Digital

TechChefz Digital (TCZ Digital Private Ltd) is a global **digital transformation agency** with a bold vision to help businesses navigate and thrive in an increasingly digital world. With its **headquarters in Noida, India**, and a strong global presence in the **USA, UK, Middle East**, and **India**, the company focuses on delivering transformative, cutting-edge solutions that drive **business growth** and **customer engagement** through innovative digital technologies.

At **TechChefz Digital**, we specialize in developing holistic digital solutions that empower businesses to embrace **cloud transformation, advanced AI technologies**, and **omnichannel customer experiences**. Our comprehensive offerings are designed to **optimize business operations, enhance brand presence**, and **automate processes** with precision.

We serve various industries, including **finance, automotive, e-commerce, retail, healthcare, technology, Oil and gas industry, etc.**

Our Mission, Vision, & Values:

Our Vision: Be a partner for industry verticals on the inevitable journey towards enterprise transformation and future-readiness, by harnessing the growing power of **Artificial Intelligence, Machine Learning, Data Science, and emerging methodologies, with the immediacy of impact and swiftness of outcome."**

We cater to various industries, including **finance, automotive, e-commerce, retail, healthcare, and technology.**

"Our Mission: To decode data, and code new intelligence into products and automation, engineer, develop and deploy systems and applications that redefine experiences and realign business growth."

Our Values— Our values are at the core of everything we create at TechChefz Digital: We prioritize our customers while fostering a people-first culture within our team. With a strong focus on collaboration, ownership, and community, we work together to innovate and develop next-generation software products, using cutting-edge tools and technologies.

- Customer-Centric Ethos: Placing our client's needs at the heart of everything we do.
- People-Centric Paradigm: We empower our people, ensuring every voice is heard and talent is nurtured in a supportive environment.
- Community Spirit: Collaboration is key. We share, learn, and grow together, driving collective progress.
- Ownership & Collaboration: We own our work and team up seamlessly, ensuring accountability and shared success.

- Talent Magnet through Communities: We attract top talent by creating thriving communities that value skill-sharing and innovation.

Our History:

2017

A digital transformation - Transforming markets and empowering talent

With an intense focus on digital transformation, Techchefz began its journey into the worldwide market of Europe, Australia, and Africa with an advanced car accelerator app. Making this a turning point for the company, Techchefz successfully delivered 10+ technology training to 500+ individuals in the USA and India.

2018

Strategic alliance: Partnership and impactful collaboration

TechChefz built its reputation as a trusted partner through collaborations with top automotive brands and financial institutions. In 2018, it expanded globally and formed strategic partnerships with digital agencies and system integrators, gaining access to enterprise accounts. The focus was on CMS (AEM), Commerce (Magento), Microservices (Node JS), and Custom Dashboards (React JS). This year marked key milestones, cementing TechChefz's status as a reliable industry partner.

2019

Remarkable growth: Laying the groundwork work for future success

With a new office in Pune and an upgraded Delhi headquarters, TechChefz expanded its operational, technical, and geographical reach, growing the team to over 50 members, including interns and experienced professionals. This strategic growth attracted more SME and enterprise clients, reinforcing our position as a tech industry innovator and marking another milestone in our journey.

2020

Resilience and innovation: A response to the pandemic

Despite challenges, TechChefz stayed united and kept its entire workforce. 2020 began ambitiously, but the COVID-19 pandemic caused a three-month standstill, impacting business and cash flow. Still, we remained resilient, exploring new product ideas, seeking grants, and driving digital transformation. This period strengthened our resolve and adaptability.

2021

Automation and Training: TechChefz's Keys to Managing Growth

Techchefz expanded its workforce amidst challenges like the tech talent shortage and high hiring costs. The Company tackled rapid growth and operational demand, embraced remote work, and launched comprehensive training programs.

2022

Solidifying a Competitive Edge in the Tech Industry: Innovation and Employee Development
Despite many challenges amid the 'Great Resignation', the company implemented strategic retention strategies and conducted unplanned assessments. The increase in revenue growth and workforce marked another successful year for TechChefz Digital, with its dedication to innovation, employee development, and strategic growth.

2023

Adapting to Recession and Geopolitical Turmoil: A Strategic Move

Techchefz revolutionized as TechChefz Digital, marked by cosmopolitan recession and geopolitical turmoil. In a volatile market, Techchefz Digital proved to be a resilient and adaptive partner by shifting its focus to consulting, platform selection, and comprehensive client ground maps, which in turn led to clients navigating the digital transformation.

2024

Expanding Expertise: Rebuilding Connections and Collaboration

TechChefz Digital celebrates a milestone with our new Noida office, marking a return to in-person work. We're boosting expertise in Data Science, AI/ML, and LLMs, expanding into the US, UK, EU, and the Middle East. With GenAI and RPA, we're enhancing efficiency and refining our go-to-market strategy.

Our Core Services & Solutions

TechChefz Digital offers a comprehensive range of **digital transformation solutions** designed to address various business needs, improve customer engagement, and optimize operational efficiency. Below is the detailed list of all the solutions they provide, including **Adobe Experience Manager (AEM)** solutions:

1. Strategy & Digital Transformation

- **Digital Transformation Roadmap:** Modernizing tech stacks, guiding businesses through their digital journey.
- **Product Strategy:** Crafting effective product strategies aligned with business goals.
- **Customer Experience (CX) Optimization:** Enhancing customer engagement with personalized experiences.
- **Data Analytics:** Leveraging data for business insights and better decision-making.
- **Cloud Transformation:** Transitioning to scalable and cost-efficient cloud solutions.

2. Product Engineering & Custom Development

- **Enterprise Web & Mobile Development:** Tailored web and mobile apps for enterprises.
- **Microservices & API Integration:** Building scalable systems with microservices architecture and seamless API integrations.
- **Quality Engineering:** Ensuring optimal product performance through automated testing and quality assurance.
- **Custom Software Development:** Designing custom software solutions to meet unique business needs.

3. Customer Experience & Marketing Technology

- **Journey Mapping & Analytics:** Understanding customer journeys to create targeted experiences.
- **Content Architecture:** Structuring content efficiently across multiple platforms.
- **Personalization:** Dynamic content and personalized engagement based on user behavior.
- **Campaign Management:** AI-driven automation for smarter, more effective campaigns.
- **Conversion Rate Optimization (CRO):** A/B testing, analytics, and optimization techniques to improve conversion rates.

4. Enterprise Platforms & Systems Integration

- **CMS Platform Selection & Integration:** Implementing best-fit CMS solutions (including AEM).
- **E-commerce Platforms:** Implementing and optimizing e-commerce platforms like **Magento**, **Shopify**, and **WooCommerce**.
- **Learning Management Systems (LMS):** Integrating learning platforms that align with business goals.
- **CRM & ERP System Integration:** Seamless integration between enterprise systems like **CRM** (Salesforce, HubSpot) and **ERP**.

5. Analytics, Data Science & Business Intelligence

- **Predictive Analytics:** Utilizing machine learning and predictive models to forecast trends and customer behavior.

- **Business Intelligence (BI):** Dashboards and tools to provide real-time business insights.
 - **Recommendation Engines:** AI-based engines for product recommendations and content personalization.
 - **Intelligent Search & NLP:** Enhancing search experiences using Natural Language Processing and machine learning algorithms.
-

6. AI & Automation Solutions

- **Generative AI:** Creating content such as images, text, and videos using AI-driven models.
 - **AI-Powered Chatbots & Voice Assistants:** Enhancing customer support and engagement through AI-driven conversational agents.
 - **Robotic Process Automation (RPA):** Automating repetitive tasks and improving workflow efficiency.
 - **AI for Fraud Detection:** Using AI to detect and prevent fraudulent activities within systems and transactions.
-

7. Adobe Experience Manager (AEM) Solutions

- **AEM Implementation & Customization:** Full-service implementation, including setup, configuration, and custom development.
 - **Content Management:** Streamlining content creation and management through AEM's user-friendly interface.
 - **AEM Personalization:** Delivering personalized digital experiences using AEM's targeting and audience segmentation features.
 - **Multi-Site Management:** Managing and scaling multiple websites and regions with AEM's multi-site capabilities.
 - **AEM Integration:** Integrating AEM with third-party platforms such as **CRM**, **ERP**, and e-commerce systems.
 - **AEM Migration:** Helping businesses migrate from legacy CMS platforms to AEM seamlessly.
 - **AEM Support & Maintenance:** Providing ongoing support and optimization for AEM environments.
-

8. Cloud Services

- **Cloud Strategy & Consulting:** Helping businesses define and execute cloud adoption strategies.

- **Cloud Migration:** Smooth migration of business operations and applications to the cloud (AWS, Azure, GCP).
 - **Cloud Infrastructure Management:** Managing and optimizing cloud infrastructure for efficiency and scalability.
 - **Cloud Security:** Implementing security measures to protect cloud-hosted data and applications.
-

9. E-Commerce Solutions

- **Marketplace Development:** Building scalable, multi-vendor marketplace platforms using technologies like **Magento**, **Shopify Plus**, and **WooCommerce**.
 - **Omnichannel Commerce:** Integrating e-commerce platforms with physical and digital sales channels for seamless shopping experiences.
 - **AI-Powered Commerce:** Leveraging AI for product recommendations, inventory management, and customer insights.
-

10. UX/UI Design & User-Centered Development

- **UI/UX Design:** Creating intuitive, engaging interfaces that improve user experience across websites and apps.
- **User Research & Testing:** Understanding user behavior through research and testing to create optimal digital solutions.
- **Prototyping & Wireframing:** Designing interactive prototypes and wireframes to visualize digital products.

TechChefz Digital Solution Accelerators

At **TechChefz Digital**, we recognize that every business strives for efficiency and speed. To support these efforts, we offer a suite of **Solution Accelerators** designed to help organizations **accelerate their journey from idea to impact**. Our **toolkits** are specifically tailored to fast-track **critical** and **impactful tech projects**, enabling businesses to **streamline their processes** and achieve **transformational outcomes** faster than ever before.

Here's an in-depth look at the innovative **Accelerators** TechChefz Digital offers to fast-track your success:

1. Business Process Automation: LLM Powered Agents

Overview:

Our **AI-powered agents** are designed to automate complex, time-consuming business processes. By leveraging the latest technologies such as **Langchain** and **MongoDB**, these agents can handle a variety of tasks, including **data collection** and **web navigation**, all tailored to your specific business needs.

How it works:

- **AI Agents** can be customized to automate business workflows.
- Use of **Langchain** ensures advanced capabilities for handling and processing web content and data.
- Integration with **MongoDB** enables efficient data storage and management.

Impact:

- **Significant time savings** by automating repetitive tasks.
 - **Enhanced productivity**, allowing employees to focus on higher-value work.
 - **Increased accuracy** and reduction of human errors in critical processes.
-

2. Customer Service: Sentiment Classification Using BERT

Overview:

This accelerator leverages **Advanced AI** and **Hugging Face transformers** to **categorize customer reviews** into positive, negative, or neutral sentiments. It helps businesses gain actionable insights into customer feedback by analyzing reviews, enabling companies to respond proactively to customer concerns and improve their offerings.

How it works:

- **BERT (Bidirectional Encoder Representations from Transformers)** is fine-tuned to understand sentiment in customer feedback.
- The tool processes **customer reviews**, assigning sentiment categories that can help prioritize responses or improvements.
- The solution helps automate feedback analysis, improving the speed and accuracy of customer service interactions.

Impact:

- **Actionable insights** for customer service teams to improve engagement and responses.
- **Proactive improvements** based on real-time feedback analysis.
- **Enhanced customer experience** by responding quickly and appropriately to customer sentiments.

3. Artificial Intelligence: Fine-Tuning Large Language Models

Overview:

Large Language Models (LLMs), such as **Mistral 7B**, are at the forefront of AI innovation. In this accelerator, **TechChefz Digital** showcases its technical prowess by fine-tuning the **Mistral 7B** model on the **VIGO dataset**, which is an open-source dataset for training large-scale language models.

How it works:

- We fine-tune **Mistral 7B** to improve its accuracy and relevancy based on specific datasets like **VIGO**.
- This allows the AI to be **more context-aware** and **aligned** with your particular business needs.

Impact:

- **Enhanced AI accuracy**, enabling more effective AI-driven applications.
 - **Open-source innovation** that leads to **cost-effective AI solutions**.
 - Potential to integrate fine-tuned models into a range of industries like **customer service**, **marketing**, and **automation**.
-

4. E-Commerce: Image Similarity Search

Overview:

In the e-commerce world, **product discovery** can be a challenge. Our **AI-powered Image Similarity Search Accelerator** revolutionizes product search by allowing customers to **upload an image** and instantly find matching or similar items. This tool enhances the shopping experience and drives higher engagement by enabling users to find products more efficiently.

How it works:

- Customers upload an image of the product they are looking for.
- The AI model uses **image recognition** to search for visually similar products from the e-commerce site's catalog.
- **Product recommendations** are delivered instantly based on visual matches.

Impact:

- **Improved user experience**, reducing time spent searching for products.
- **Higher conversion rates** as customers can quickly find what they are looking for.
- **Differentiation** from competitors with advanced AI-powered product discovery features.

5. Customer Service: RAG Chatbots

Overview:

RAG (Retrieval-Augmented Generation) chatbots are designed to provide **timely and relevant responses** to customer queries. By combining retrieval-based models with generative capabilities, these chatbots offer precise and contextually accurate answers. Our RAG-powered chatbots provide a **more intelligent and tailored experience**, making customer interactions smoother and more efficient.

How it works:

- The chatbot first retrieves **relevant data** from a knowledge base or external sources.
- It then **generates** responses based on this data, ensuring that each answer is aligned with the user's query.
- RAG technology ensures that chatbots provide **relevant** and **up-to-date** information.

Impact:

- **Enhanced customer satisfaction** with more precise and relevant answers.
- **24/7 support** capabilities, improving overall customer service availability.
- **Increased operational efficiency** by automating customer interactions at scale.

Request a Demo and Browse Accelerators:

At **TechChefz Digital**, we offer you the opportunity to experience the **power** and **potential** of these accelerators first-hand. Whether you're looking to streamline **business processes**, enhance **customer service**, or accelerate your **e-commerce strategies**, our solution accelerators are built to drive fast, impactful results.

Get started today by requesting a demo or browsing through our accelerator offerings to discover the right tools that will transform your tech projects and **accelerate your success**.

Our Tech stack:

Empowering Solutions with Cutting-Edge Technology Stacks

At TechChefz Digital, we leverage a robust and diverse range of technology stacks across various domains to deliver innovative, scalable, and high-performing digital solutions. Below is a breakdown of the primary technologies we use:

1. Web & Mobile Development

- Frontend Development:
 - HTML5: Markup language for structuring web content.
 - CSS/JS: Styling and interactivity for dynamic user experiences.
 - React JS: JavaScript library for building user interfaces with a component-based approach.
 - Angular JS: JavaScript framework for developing dynamic, single-page applications (SPAs).
 - Vue JS: Progressive JavaScript framework for building user interfaces and SPAs.
 - Next JS: React-based framework for server-side rendering and static website generation.
 - Mobile Development:
 - React Native: Framework for building native mobile applications using React.
 - Flutter: UI toolkit for building natively compiled applications for mobile, web, and desktop from a single codebase.
 - Backend Development:
 - Node JS: JavaScript runtime for building scalable backend services.
 - Python: High-level programming language used for backend services, machine learning, and data science.
 - Frappe: Full-stack web application framework based on Python and JavaScript.
 - Java: Widely used programming language for enterprise-grade backend solutions.
 - Spring Boot: Java-based framework for building production-grade applications.
 - Go Lang: Language designed for simplicity and performance, ideal for scalable applications.
 - Databases:
 - MongoDB: NoSQL database known for its scalability and flexibility.
 - PostgreSQL: Open-source relational database system.
 - MySQL: Popular relational database management system (RDBMS).
-

2. Content Management Systems (CMS)

- Adobe Experience Manager (AEM): Leading enterprise CMS platform for building personalized, scalable digital experiences.
- Acquia / Drupal: Flexible CMS solution for creating customized websites and applications.

- Strapi: Open-source headless CMS to build APIs in JavaScript.
 - WordPress: Popular open-source CMS for creating and managing websites.
-

3. 3D, AR & VR

- Maya: Leading 3D animation software for creating realistic 3D models and animations.
 - Unity: Cross-platform game engine used for developing immersive AR/VR experiences.
 - Three JS: JavaScript library for creating 3D content on the web.
 - WebGL: API for rendering interactive 3D and 2D graphics in a browser without plugins.
 - React 360: Framework for creating virtual reality (VR) content using React.
 - AR.js: Open-source library for building Augmented Reality (AR) applications on the web.
-

4. Learning Management System (LMS)

- Canvas: Modern, open-source learning management system used for creating and managing educational content.
 - Adobe Learning Manager: Scalable and customizable platform for delivering learning content and experiences.
-

5. E-Commerce Solutions

- Adobe Commerce Cloud: Enterprise e-commerce platform with powerful features for building digital storefronts and managing customer experiences.
 - Magento: Open-source e-commerce platform for building custom e-commerce websites.
 - Shopify: Leading cloud-based e-commerce platform for building online stores.
 - Salesforce Commerce Cloud (SFCC): Cloud-based e-commerce solution for delivering personalized shopping experiences.
-

6. Analytics

- Google Analytics - GA4: Web analytics service for tracking website traffic and user behavior.
 - Adobe Analytics: Advanced analytics solution for real-time data collection and reporting.
 - Microsoft Clarity: Free, easy-to-use analytics tool that provides insights into user behavior.
 - Hotjar: Behavioral analytics tool to track user activity, heatmaps, and feedback.
-

7. Personalization & Marketing Cloud

- Adobe Target: Personalized content and experiences using AI and machine learning to enhance customer engagement.
 - Adobe Marketo Engage: Marketing automation platform to streamline customer engagement and lead management.
 - Adobe Campaign Manager: Marketing campaign management tool for creating, automating, and analyzing cross-channel marketing campaigns.
 - Salesforce Marketing Cloud (SFMC): Cloud-based platform for managing and optimizing customer journeys and marketing campaigns.
 - Webengage: Marketing automation platform for personalizing messages and increasing engagement.
 - Moengage: Customer engagement platform offering push notifications, in-app messaging, and email marketing.
 - Clevertap: Platform for customer retention and engagement through personalized messaging and automation.
-

8. Cloud & DevSecOps

- Cloud Platforms:
 - AWS: Cloud computing services from Amazon for infrastructure, applications, and scalability.
 - MS-Azure: Cloud platform from Microsoft offering a range of cloud services.
 - Google Cloud: Cloud computing services from Google for scalable infrastructure and machine learning.
- Infrastructure as Code & Automation:
 - Terraform: Open-source infrastructure as code tool for provisioning and managing cloud infrastructure.
 - Kubernetes: Open-source system for automating containerized applications' deployment and scaling.
 - Docker: Platform for developing, shipping, and running applications in containers.
- Monitoring & Security:
 - ELK Stack (Elasticsearch, Logstash, Kibana): Set of tools for logging, data analysis, and visualizing logs.
 - Grafana: Open-source platform for monitoring and analyzing time-series data.
 - New Relic: Application performance management tool for monitoring and optimizing applications.
 - Prometheus: Open-source monitoring system and time-series database.
 - Jenkins: Open-source automation server for continuous integration and continuous delivery (CI/CD).
 - Apache Kafka: Distributed event streaming platform for real-time data processing.
 - Elastic Search: Search and analytics engine for exploring large datasets.

- Redis: In-memory data structure store used for caching and real-time analytics.
 - Web Servers & Proxy Servers:
 - NGINX: Web server and reverse proxy server for high-performance web applications.
 - Apache HTTP Server: Popular open-source web server software.
 - Security & Performance Monitoring:
 - Splunk: Platform for searching, monitoring, and analyzing machine data.
 - Datadog: Cloud-based platform for monitoring applications and infrastructure.
 - Beats: Lightweight data shippers for sending log data to centralized systems like ELK.
 - Git: Version control system for managing source code.
-

Our Case Studies/Success story:

1. Global Universities: Multi-Brand, Multi-Locale, and Multilingual Digital Platform

Industry: Higher Education

Platform: Web, Responsive

Technologies Used: AEM (Adobe Experience Manager), React JS

Services Provided: Web Design, Content Management System (CMS)

Overview:

TechChefz Digital developed a robust, scalable, and efficient digital platform for **Graphic Era University** that caters to multiple campuses, languages, and regions. The project involved creating a multi-brand, multi-locale, and multilingual digital platform that ensured brand consistency and user satisfaction across all campuses.

Goals & Objectives:

- **Maximize Brand Consistency:** Build a platform that maintains consistent branding across all locations and provides seamless navigation for users.
- **Implement a Robust CMS:** Leverage **AEM** as the Content Management System (CMS) to create reusable templates and components, enabling scalable content management for each campus.
- **Content Automation:** Introduce automation through **React-based Global Variables dashboards** to streamline content management, ensuring up-to-date and accurate information.
- **System Integration:** Integrate with **Admission Automation, CRM, and ERP** systems for smooth data flow and to enhance user experiences, boosting conversion rates.

Challenges:

- Ensuring **consistent branding** across multiple campuses and locations.
- Creating a **structured, easy-to-navigate website** that works well for various types of users.
- Managing website content across **multiple locations** and ensuring **localization** without compromising the user experience.
- Ensuring **accessibility compliance** with ADA (Americans with Disabilities Act).

Solutions:

- Built a digital platform on **AEM** with reusable components and templates.
- Introduced **Content Ops Automation** using React-based dashboards to simplify content management.
- Integrated with key systems (Admission, CRM, ERP) for a unified user experience.

Business Impact:

- **Customization** of content and marketing strategies based on locales, languages, and markets.
 - Increased **website traffic** and user engagement by **2x**.
 - Reduced **website maintenance costs** by **80%** and optimized hosting.
-

2. Housing Finance & Banking Firm: Revolutionizing Digital Experiences

Industry: Banking & Finance

Platform: Web, Responsive

Services Provided: Web Design, Content Management, Retail CMS

Overview:

TechChefz Digital worked with a leading **Indian Mortgage Finance and Realty firm** to create a **seamless digital ecosystem** for customer, partner, and internal stakeholder touchpoints. The focus was on making home loans paperless, enhancing customer engagement, and introducing AI-based recommendations to optimize user interactions.

Goals & Objectives:

- **Become the top housing finance company** in India by offering **seamless online services**.
- **Digitize Home Loans** and **paperless processes** for enhanced customer convenience.
- **Introduce AI** to deliver personalized market data analysis and recommendations.
- Implement an **omnichannel experience** to provide a seamless journey for users across all touchpoints.

Challenges:

- The company lacked a **digital presence** and had only a static website.
- Needed to build a **digital ecosystem** that integrates with existing banking systems.
- Required a solution to enhance customer engagement without requiring physical branch visits.

Solutions:

- Developed **multi-regional corporate websites** with language localization and analytics for enhanced user personalization.
- Introduced **AI-driven recommendations** and **paperless loan applications** to streamline processes.
- Built **internal portals** and dashboards for efficient management of data and customer interactions.

Business Impact:

- Unified technology and improved **collaboration** across teams (Sales, Marketing, and Branches).
- Enhanced **customer retention** by **4x**.
- Streamlined **data governance** and **compliance**, ensuring **100%** adherence to regulations.

3. Global Automotive Brand: Transforming the Digital Ecosystem

Industry: Automotive/Manufacturing

Platform: Web, Responsive

Technologies Used: AEM, Magento Commerce, React JS, Node JS, Python, MS-Azure, Kubernetes, Docker

Services Provided: Web Design, Content Management, E-commerce Solutions, Microservices

Overview:

TechChefz Digital helped a **global automotive brand** develop a comprehensive **digital ecosystem** that spans multiple countries and business units. The platform provides services like motorcycle sales (new and pre-owned), accessories, apparel, service & repair, events, tours, and rentals.

Goals & Objectives:

- **Enhance Omni-Channel Growth** and **customer experience** by unifying online and offline data for seamless interactions.
- Implement **personalized content strategies** and **user-centric design** to improve conversion rates and user engagement.
- Streamline technology across markets and ensure **consistent brand messaging**.

Challenges:

- **Decentralized digital interfaces** prevented unified brand growth.
- **Disconnected data** between offline dealers and the online platform.
- Dealers were isolated from the brand's marketing strategy, leading to missed opportunities.

Solutions:

- Created a **multi-locale, multilingual platform** that integrates **Dealer Management Systems (DMS)**, **CRM**, and other business applications.
- Implemented a scalable **Adobe Experience Manager (AEM)** platform with **Magento Commerce** for e-commerce.
- Integrated **online and offline data**, including dealer and customer interactions, to drive personalized experiences.

Business Impact:

- **Increased customer retention** by **1.7x**.
- Enhanced **brand awareness** by **192%**.
- Supported operations in **35+ countries**, enabling a consistent **omnichannel experience** across dealers, service centers, and distributors.

We cater to various industries, including **finance, automotive, e-commerce, retail, healthcare, technology, Oil and gas industry, etc.**
